DETAILED ACTION

1. The Appeal Brief filed 4/7/05 has been fully considered in preparing this Office action. Applicant's Arguments provided in pages 9-20 of the Appeal Brief have overcome all of the rejections recited in the Final Office action mailed 8/6/04.

Allowable Subject Matter

2. Claims 1-17 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a head tracker system for determining a user's head orientation relative to a datum. Each of the independent claims 1, 2 and 15 requires an optical correlator (26) whereas the closest prior art, the Hirota patent (U.S. Patent No. 6,064,749), the Teitel patent (U.S. Patent No. 5,812,257), and the Symosek (U.S. Patent No. 5,424,556) disclose conventional head tracker systems, either singularly or in combination, fails to teach or suggest the limitation of the optical correlator that is in combination with other claimed limitations obvious as particularly pointed out in pages 18-19 of the Appeal Brief.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They are U.S. Patents Nos.: 6,377,401 and 6,369,779 to Barlett, 5,742,263 to Wang
